

EASTERN MOORING SYSTEMS

STAR DOCK MOORING FIELD DEVELOPMENT

Advantages

We have collected the best of the dock construction industry to help with mooring field development. Star Docks are proven components in mooring field layouts. Review our White Paper on Mooring Field Administration (pdf)

- Increase the Mooring Space & Access
- Monitored Harbor Management
- Safer Maneuvering Areas
- Revenue Controls
- Aids Pollution Control
- Cost Effective
- Aids Environmental Control
- Specifically designed for deep, sensitive and salt water conditions

Anchoring

Specifically designed for offshore sites, the exclusive anchoring systems is proven in installations world-wide (at such notable sites as Dubai Palm Island, 2008 Olympics). Anchoring systems are site specific and designed for wind and water changes, boat sizes and environmental conditions.

Flotation

Specifically designed for offshore sites, the exclusive anchoring systems is proven in installations world-wide (at such notable sites as Dubia Palm Island, 2008 Olympics). Anchoring systems are site specific and designed for water changes, boat sizes and environmental conditions.

Steel Module Frames

Special marine coated steel dock frame and deck exclusively manufactured for Star Dock applications.

Aluminum Module Frames

Marine grade aluminum frames with composite decking (recycled/recyclable content).

Hardware

Bolt-through fastening for all cleats and mooring attachments. Choice of galvanized, stainless or composite materials.

Accessories & Options

Pumpout facilities, trash receptacles and other pollution/waste control equipment. Pumpout sizes and holding capabilities are designed for site specific applications.

Environmental monitoring and marine habitat devices available.

Dingy launch and water access points.

Regulatory and information signage.

EASTERN MOORING SYSTEMS

STAR DOCK MOORING FIELD DEVELOPMENT

SeaFlex Anchoring

State-of-the-art (but with over a 25 year history).

The pile-less system creates a stable surface at all times.

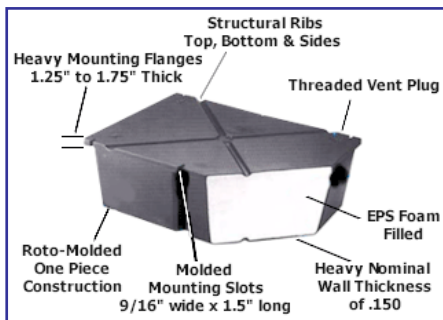

Please contact us for a list of qualified contractors.

Installation

Module components are pre-engineered for structural strength and designed for quick assembly.

Modules install six times faster than similar systems.

Materials

Extra heavy-duty marine grade materials and fastening hardware.

Extended warranties and proven quality.

Options & Accessories

Self-contained, low maintenance cleaning and waste removal stations.

Pumpout, fish cleaning, recycling

Regulatory and information signage.
